**CHARGED WITH ROBBERY**  
Richard Kennedy, of Boyer, was before Squire A. E. Smith on Wednesday morning for a preliminary hearing on the charge of holding up and robbing John Slayton, of Boyer, on Monday night, March 21. Kennedy was held under bond to await the action of the grand jury. He is charged with entering the house of his kinsman, John Slayton, in the night time, with pistol and flashlight in hand, and demanding money. Mr. Slayton is 72 years of age and getting feeble. He asked the intruder if he was not fooling. The reply was a heavy blow in the face, which knocked him over. When he got up he found a pistol presented at his forehead, and he gave up his money, about \$200. Slayton thinks he recognized Kennedy by his voice.

Kennedy was arrested at Marlinton Saturday morning and lodged in jail. He is about 28 years of age and a native of Pocahontas. He has not lived here the past ten years. His wife died about a year ago, and he has two children who live with their grandparents at Grafton.

**Editor of Pocahontas Times:**  
I read in a recent issue of your paper the protest, in regard to the sale of the County Farm for the Poor, written by "X" and I heartily agree with him. It has been disappointing that the issue has not been agitated more freely.

If you will allow me space in your paper I wish to add a few statements as a supplement to the above mentioned protest.

The Home for the Poor, being a County Institution, should be so located and managed as to give the best service to the greatest number of its citizens at a reasonable cost. In my opinion this can be done at the present location as well as any other else. The tendency in recent years has been to take such institutions out of town rather than into town. It is true that our poor are not as well provided for at present as they should be but the improvements needed can be made on the present location just as well as on a new one. The County already owns this farm and I do not think it can be sold for more than ten or twelve thousand dollars. Some of the farming land is a little rough but very fertile and in good condition. Where can we get as good location for the same price? Shall we make a change simply for the sake of a change? Certainly not unless there is some advantage to be derived from a change. The inmates quarters would be almost worthless for any other use and a total loss if the farm was sold. I do not know the sentiment of the people in regard to this matter but I am sure if they are properly informed they will be decidedly against a change of location.

It is true that there is some disadvantage in having the Home located in one end of the County. This objection would be more valid if we did not already have one and was establishing a new one. For several years the average has been about one admission each year. At this rate the additional cost for transportation to the present location will be very little.

The number of inmates at present is seven; 3 men, 3 women and 1 child. Three are feeble minded, one is an arrested case of tuberculosis, two are crippled from chronic diseases and the child (4 years old) is healthy. All except two are active and enjoy outdoor life. One of the crippled can walk some but the other very little. All of them have lived practically all their lives in the country and certainly feel more at home there than in town.

The loss to this community or the gain to some other from the removal of the Home would be very slight, as the number of inmates is so small.

The County should provide these unfortunate individuals a home, as near like a home in a well regulated family among their own kin, as it can. With a few changes and a comparatively little additional cost this can be done on the present location as well or better than any where else.

I would suggest the following changes:  
1 The inmates at present are housed fairly comfortable but some improvements are certainly desirable. They have no bath room. This should be provided with hot and cold water. Running water (gravity system) has been installed in the Superintendent's house and could be extended to the inmates quarters with very little additional cost.  
2 At present both renting of the farm and letting of the contract for keeping the inmates is done by competitive bid. This is a very democratic method but a very bad system and can never give the best results. The County Court should select the Superintendent because of his and his wife's special fitness for the position. I mention the Superintendent's wife because she has to deal with the inmates as much or more than he does. The Superintendent should be paid a salary or employed by contract and everything on the farm should be owned by the County. I worked well in Greenbrier County for many years.  
3 The County should employ and pay a nurse, matron or attendant to look after the inmates. She should see that they bathe regularly, that their quarters are kept clean, attend to their clothing, nurse them when sick and give them such other attention as they may need. This position would not require an expensive employee. At present the Superintendent's wife performs these duties. She has all she can attend to properly without these additional cares.

Let us hear from others, both pro and con.

**Stewart MOTOR TRUCKS**

Stewart Trucks have won —By costing less to run

QUALITY and Economy have brought Stewart success. For Stewart Trucks built eight years ago are still working profitably for their owners; earning daily satisfaction and paying dividends on the investment.

They are sturdy trucks—designed right, built right, and priced right. The very first ones made still serve the needs of trade. Their first cost is \$200 to \$700 less than the average price of other trucks, and the saving continues throughout the truck's long life—on upkeep, on repairs, tires, gasoline and oil.

Capacities: 3-4, 1, 1-1-2, and 3 1-2 ton
